EDUCATION

University of Grenoble-Alpes, Grenoble, France

Ph.D., Geomorphology

Feb. 2014 – Mar. 2017

University of British Columbia, Vancouver, Canada

B.Sc., Geophysics

Sep. 2008 – May 2012

WORK EXPERIENCE

Oberassistent (Senior Scientist/Lecturer) in the Earth Sciences Department
at the *Swiss Federal Institute of Technology in Zurich (ETH)*

Nov. 2020 – present

Postdoctoral Researcher in the Earth Sciences Department at *ETH*

Oct. 2019 – Nov. 2020

Postdoctoral Associate in Earth, Atmospheric and Planetary Science
at *Massachusetts Institute of Technology*

Aug. 2017 – Sep. 2019

Research assistant in the geological fluid dynamics lab at
University of British Columbia

Sep. 2011 – May 2012

Hydrology field technician at *Bureau of Land Management*

Summer 2009 & 2011

GRADUATE THESIS SUPERVISION

Doctoral thesis of Karla Vlatković at ETH (expected graduation: Fall 2026)
“*Flow resistance in rough self-formed river channels*”

Nov. 2022 – present

Masters thesis of Maureen Gretener at ETH (expected graduation: Summer 2023)
“*Measuring boulder size and density in river channels using Unoccupied
Aerial Vehicles, structure-from-motion and automated image segmentation*”

Jun. 2022 – present

Masters thesis of Till Born at ETH (expected graduation: Summer 2023)
“*The Past, Present and Future of the Carpathian River Network*”

Mar. 2022 – present

Masters project of visiting student Clara Sfez from ENS, Paris
“*Roughness boundary layer characterisation of steep mountain rivers
with structure-from-motion photogrammetry*”

Mar. – Jul. 2022

Masters thesis of Di Deng at ETH (graduated Summer 2021)
“*A study of the recent evolution of Doubs River near Besançon
investigating links between tectonics, climate and network geometry*”

Jun. 2020 – Aug. 2021

Bachelors thesis of Matthew Rushlow at MIT (graduated Summer 2019)
“*Using Machine Learning, Particle Tracking, and Grain Shape Modeling
to Characterize Bed load Sediment Transport*”

Jan. 2019 – Jul. 2019

TEACHING

Instructor for Digital Topography - Masters level course at ETH 3 credits (4 hours/week for 7 weeks)	2020 – present
Instructor for Tectonic Geomorphology - Masters level course at ETH 6 credits (4 hours/week for 7 weeks and a one week field school)	2020 – present

FUNDING

Swiss National Science Foundation Projects-MINT grant as PI (CHF 273,464 / \$290,000) Grant # 200021-208068 “ <i>The importance of boulders on bedrock river network dynamics</i> ” Funding for three years of field trips to Taiwan and a PhD student	Nov. 2022 – Oct. 2026
NSERC USRA Undergraduate Student Research Award (\$6000)	2012
German DAAD international student scholarship (\$4000)	2010

PROFESSIONAL & OUTREACH EXPERIENCE

Organizer of Earth Surface Dynamics group seminar at ETH (6 invited talks/semester)	Oct. 2019 – present
Regular reviewer for the Journal of Geophysical Research: Earth Surface, Geophysical Research Letters, Geology, and Earth Surface Dynamics	4-8 times/year since 2017
Session Convener at the European Geosciences Union in Vienna, Austria	2017, 2018, 2020, 2022, 2023
Organizing committee member for the 31st HKT workshop held in Aussois, France (100 person, 3 day conference)	May 2015 – May 2016

NOTABLE INVITED TALKS

Landscapes Live online seminar [recording] : “ <i>Self formed channels with emergent channel width and sediment transport</i> ”	2022
Departmental seminar, Colorado State University, online “ <i>The Sliding Ice Incision Model</i> ”	2020
Departmental seminar, Columbia University (Lamont), New York City, USA “ <i>Following form to function: Understanding what landscape morphology reveals about mountain building</i> ”	2019
COG3 lecture, MIT, Cambridge, USA “ <i>Following form to function: Understanding what landscape morphology reveals about mountain building</i> ”	2019
BiSEPPS Seminar, Harvard University, Cambridge, USA “ <i>The surprisingly simple relationship between rainfall intensity and streamflow variability</i> ”	2018

PEER REVIEWED PUBLICATIONS
